Professional Summary

Computer Science undergraduate (CGPA 9.0) specializing in Machine Learning, Deep Learning, Generative AI, and Computer Vision. Experienced in transformer-based models, LLM applications, end-to-end ML pipelines, full-stack development, and cloud solutions, with a strong foundation in DSA, databases, software engineering, and modern web technologies.

Education

B.Tech in Computer Science and Engineering (Software Technology) 2023–Present
Centurion University of Technology and Management, Bhubaneswar *CGPA: 9.0*

Higher Secondary Education (Class XII) 2021–2023
Shanti Institute of Management and Studies, CDA, Cuttack *60.5%*

Matriculation (Class X) 2020–2021
Budhi Sahoo Nodal High School, Sankhameri *80%*

Training

Generative AI Training – Central Tool Room & Training Centre, Bhubaneswar Nov–Dec 2025

- Completed Ministry of MSME training in Deep Learning, Transfer Learning, RNN/LSTM, LLMs, Hugging Face, LangChain, RAG, and end-to-end GenAI application development.
- Built an LLM Medical Chatbot for context-aware medical information and an AI Music Composer for generating creative musical content using Generative AI.

Projects

AI WealthFlow Nexus – AI-Powered Financial Intelligence Platform *React, Three.js, Vercel*

- Developed an AI-driven platform for financial planning, wealth analysis, and personalized investment recommendations.
- Built a 3D financial dashboard using React Three Fiber, GSAP, and real-time analytics visualization; deployed via Vercel.

Crop Recommendation System via Tabular Transformers *Python, PyTorch, Scikit-learn*

- Applied TabNet and FT-Transformer on a 70K+ agricultural dataset for structured-data prediction.
- Used SHAP-based interpretability and ablation studies to evaluate model performance for precision agriculture.

Maize Leaf Disease Detection – CNN Image Classification *Python, TensorFlow, OpenCV*

- Developed computer-vision models on 30K+ images using augmentation and optimization techniques.
- Evaluated models using precision, recall, and F1-score and analysed classification failure cases.

LLM Medical Chatbot & AI Music Composer *Python, LLMs, LangChain, RAG, GenAI*

- Developed conversational AI for context-aware medical queries using LLM, RAG, retrieval techniques, and prompt engineering.
- Built a Generative AI music application that converts creative user inputs into structured musical content.

Technical Skills

Programming	Python, C, C++, Java, JavaScript, TypeScript
Web	HTML5, CSS3, React
Database	MySQL, MongoDB
ML/DL	PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers
GenAI	LLMs, LangChain, RAG, Prompt Engineering
Research	Experimental Design, SHAP, Benchmarking, Ablation Studies
Cloud/Tools	AWS (EC2, S3, IAM, RDS, Lambda), Git, GitHub, Linux, Vercel
Coursework	DSA, DBMS, Software Engineering, Web Development

Certifications

- Generative AI – Central Tool Room & Training Centre, Ministry of MSME, Bhubaneswar — 2025
- Programming in Python – Milestone Computer Centre, Jatani — 3 Months — 76% (O Grade) — 2026
- GeeksforGeeks CUTM Training Program – Competitive Coding and DSA
- Claude Code 101 – Anthropic
- NPTEL Certification in Deep Learning- IIT Ropar
